VentureGPS Vehicle Tracking Systems

Access, track, locate or select summary reports from any Internet access point, with simple intuitive user controls. This is what a VLS (Vehicle Location System) w/Active GPS was meant to be, without all the hassles of software, constant software updates, user required interactions and updates. Below is a screenshot of the home page accessible from the Internet host server, similar to what you would see when you access the site to locate your vehicles:

VentureGPS

“Chinese is OK when you are ordering takeout meals.”

For quality and reliability, you can't beat American Made VentureGPS.

Support the USA and buy Made In The USA.

VentureGPS provides you the knowledge and tools to control your vehicle fleet.

Your company assets are riding on your vehicle fleet, as well as your company reputation and public company image on the roads.

Owners & managers need to know that their vehicles are being operated in a safe and professional manor day, night, weekend or holiday, you know where your vehicles are, where your vehicles have been, the speeds they drove to get there and best of all that your investment in these systems went into an American made product that is not supporting China.
